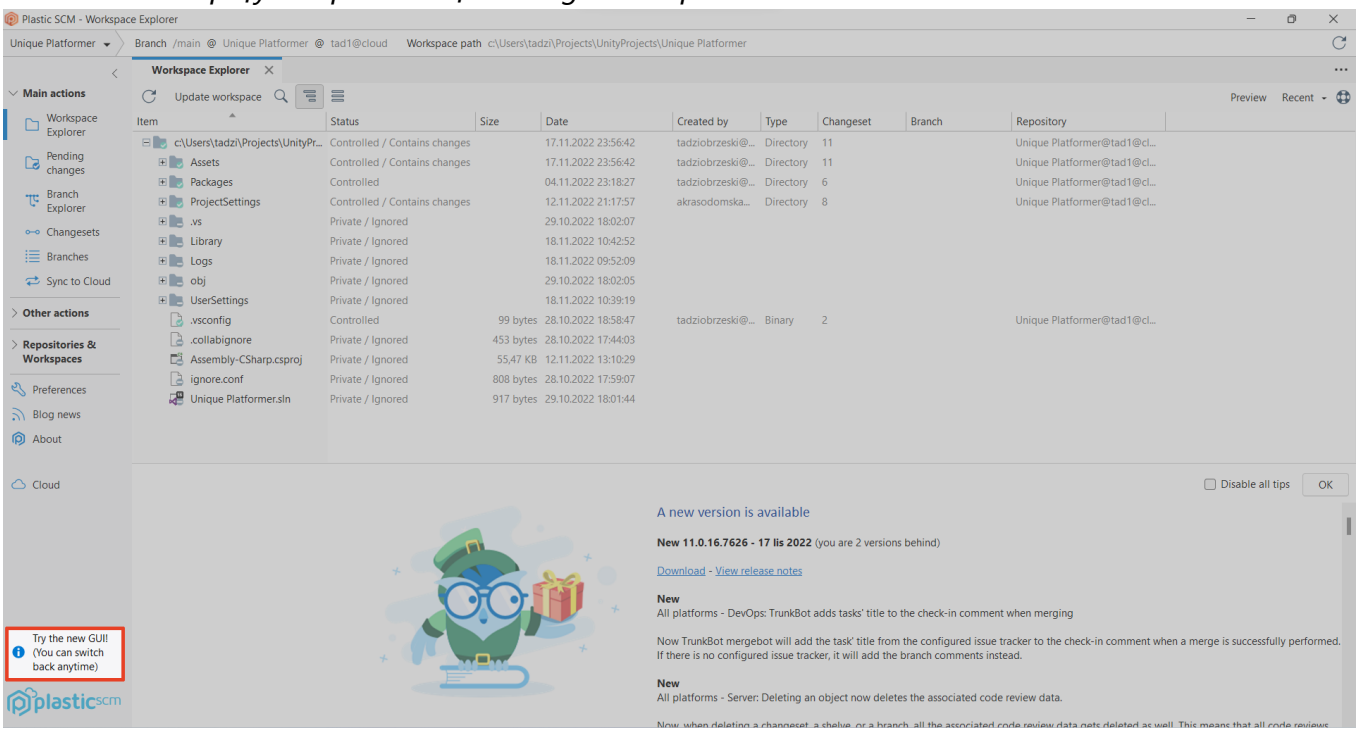
Requirements: Plastic SCM Organization.

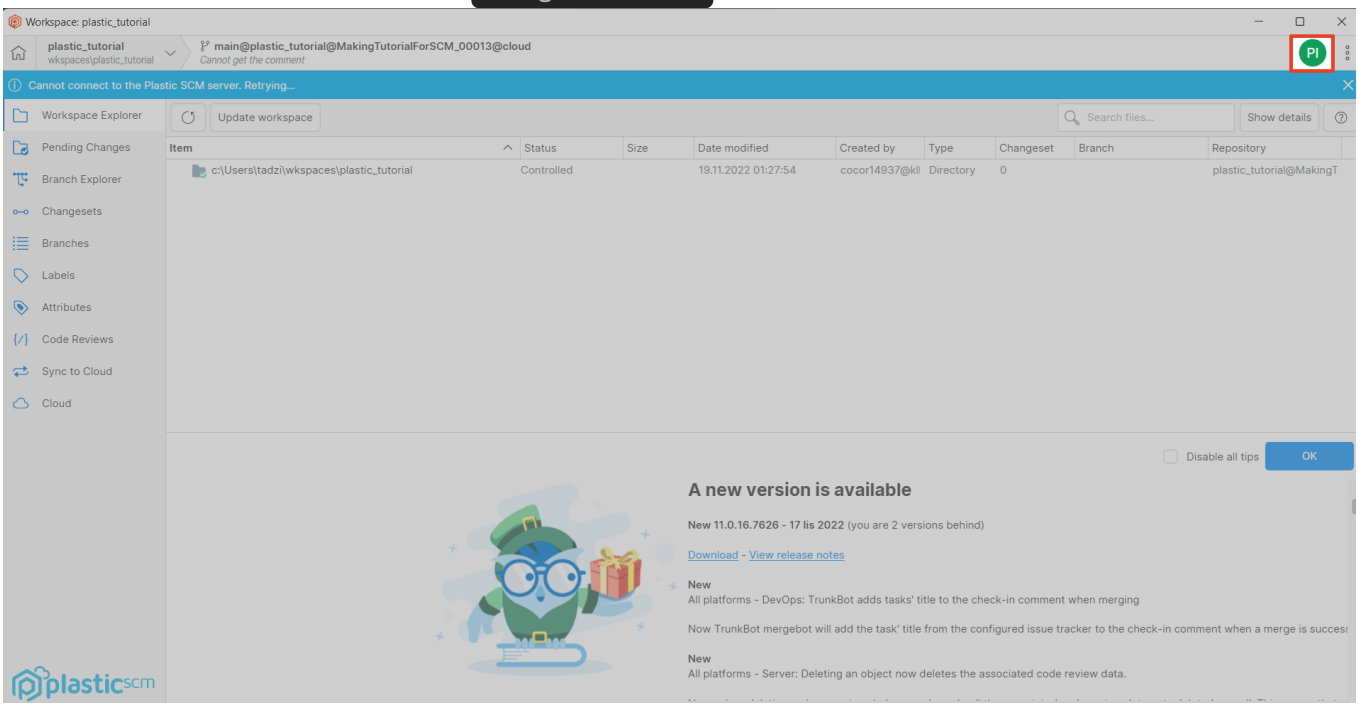
Download and Install Plastic SCM **Cloud Version** from https://www.plasticscm.com/download

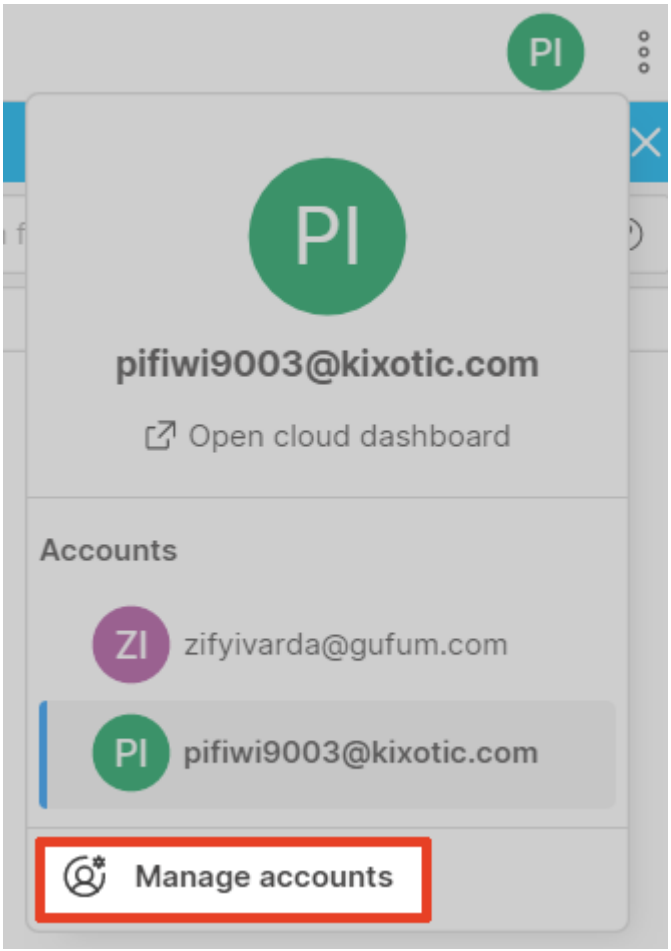
Run **Plastic SCM**. And login with `Unity ID`.

Make sure that your are using new GUI for plastic.
Newer GUI simplify the process of making new repo



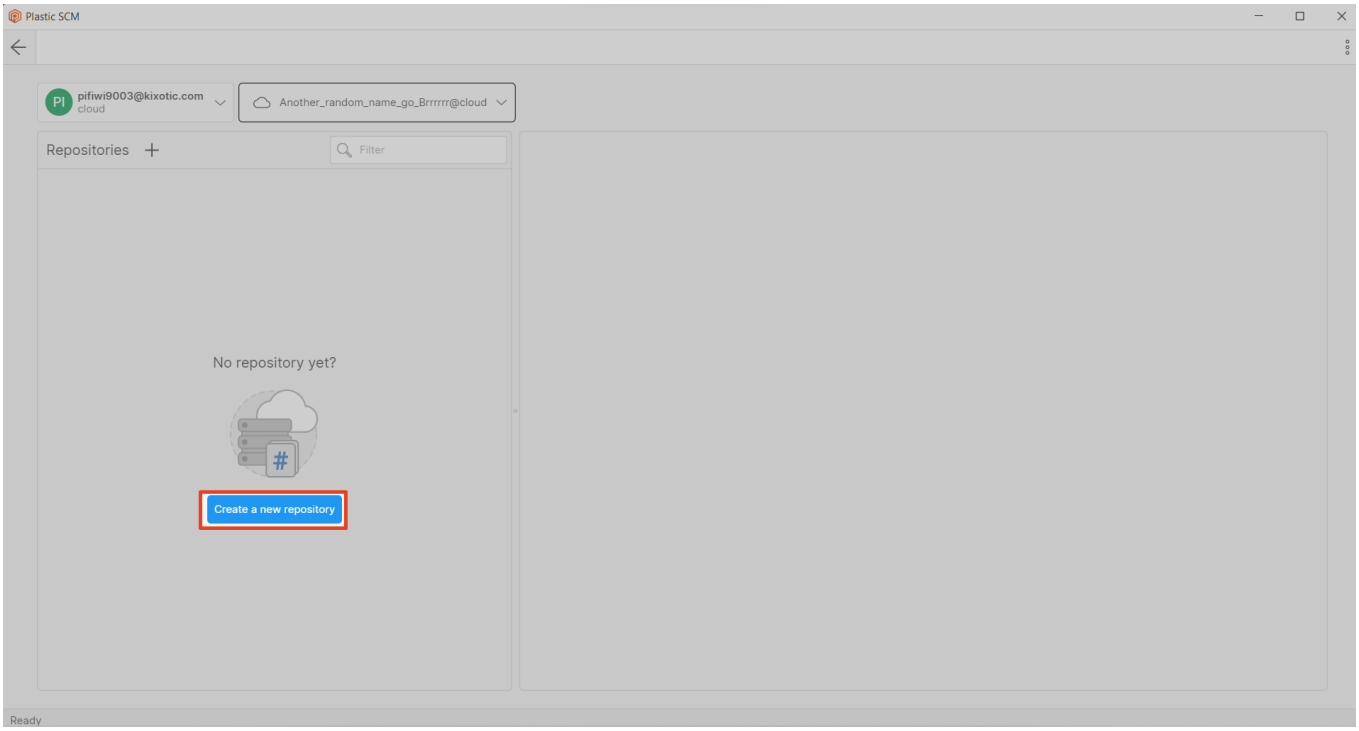
Click on account icon, and select `Manage Accounts`



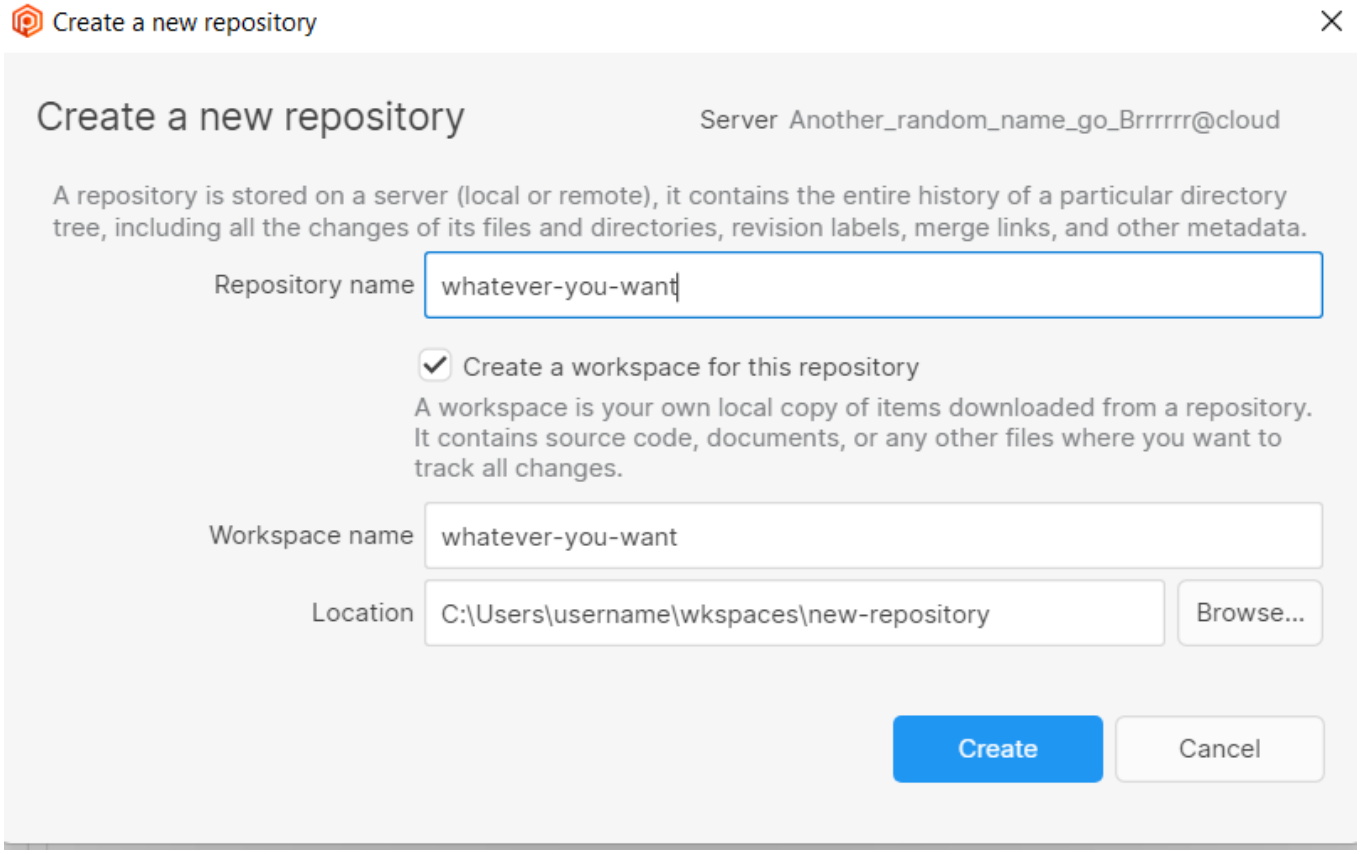


You should see something like that.

Now let's create a new repo.



Set your repository name.



It's that simple.

Now you should see your repo in list.
